

TS109 : Project: randomness and information

ECTS credits :

2.00

Evaluation :

No description

Number of hours :

Tutorial classes :	14.66
Practical work :	20.00

Teacher(s) :

BERTHOUMIEU Yannick

Title :

Project: randomness and information

Abstract :

The project "Randomness and information" allows students to practice with software Matlab implementation main tools for characterizing a set of data. Using real data, students must use all principles shown in modules MA105, MA106 and MA107.

Prerequisite :

Contenus des cours MA105, MA106 et MA107

Keyword(s) :

Histogram, probability density, normality test, correlation, linear regression
